### FEATURE

- PSBG has a 99% light blocking rate. When PSCL (Transparent Polymeric Vinyl) is combined with another film\*, it is possible to use on both sides with transparent glass or acrylic panel.
- PSTG is a crystal-clear vinyl, and it is highly recommended for window signages.
- PSTM-AF is a vinyl with a 70% frosted effect and has a bubble free adhesive which make it easy to install.
- The PGF series has two levels of embossments with frosted effect. Since it uses static cling, installation is quick, and it can be reapplied many times.
- These are safe to use since it does not fall under RoHSII or REACH.

\*For long-term usage, we do not recommend PSTG.
